

FOCUS Release 7.0.8

TM7948

December 10, 1997

**Name change for FOCDFSEG EXEC**

The CMS FOCUS install EXEC named FOCDFSEG has changed. The FOCDFSEG EXEC defines the FOCUS NSS names and addresses for the named saved segments (NSS) that we use. The variable for the FOCUS segment name is now called TRWNAME. The variable name for the FOCUS segment address is now called TRWADDR.

This was an internal name change to the FOCDFSEG EXEC. The FOCUS installation does not change.

Below is a copy of the FOCDFSEG EXEC.

```
/*-----*  
/* FOCDFSEG EXEC          (c) Copyright IBI 1989, 1990, 1997 *  
/*-----*  
/*-----*  
/*-----*  
*****  
NSS names and addresses.
```

TRW - Table, Report Writer segment

HLI - Host Language interface

DLL - Dynamic Load Libraries

Please modify the next 3 pairs of statements with:

--> your chosen segment names

--> the addresses selected for the segments

```
*****/
```

trwname = 'name'

trwaddr = '1C00-1EFF SR 1F00-22FF EW'

hliname = 'name'

hliaddr = '2400-24FF SR 2500-26FF EW'

dllname = 'name'

dlladdr = '2800-2FFF SR 3000-36FF EW'

```
*****
```
